Our values

- We believe in partnership and it has been intrinsic to our success: we never act as a single investor in any project
- We don't only build physical infrastructure, but forge favorable business environment to boost global connectivity of Ukraine
- We are pragmatic and very careful, but not afraid to take risk
- We don't miss timely opportunities, but think long-term
- We think big, but move incrementally
- We are experienced, but never stop learning
- We are successful in traditional sectors of economy, but irreversibly transitioning into the industries of the future
